Introduction

The key messages in this report

Audit quality is our number one priority. We plan our audit to focus on audit quality and have set the following audit quality objectives for this audit:

- A robust challenge of the key judgements taken in the preparation of the financial statements.
- A strong understanding of your internal control environment.
- A well planned and delivered audit that raises findings early with those charged with governance.

I have pleasure in presenting our planning report to the Audit and Risk Committee (“the Committee”) of the Scottish Land Commission (“SLC”) for the 2022/23 audit. I would like to draw your attention to the key messages of this paper:

Audit plan

We have gained an understanding of SLC following a handover from your previous auditors, discussion with management and review of relevant documentation from across the organisation.

Based on these procedures, we have developed this plan in collaboration with the organisation to ensure that we provide an effective audit service that meets your expectations and focuses on the most significant areas of importance and risk to SLC.

Key risks

We have taken an initial view as to the significant audit risks SLC faces. These are presented as a summary dashboard on page [12](#).

Wider scope requirements

Reflecting the fact that public money is involved, public audit is planned and undertaken from a wider perspective than in the private sector. The wider-scope audit specified by the Code of Audit Practice broadens the audit of the accounts to include consideration of additional aspects or risks.

In carrying out our risk assessment, we have considered the arrangements in place for each area, building on any findings and conclusions from the previous auditor, planning guidance from Audit Scotland and developments within the organisation during the year. In accordance with the Code and Audit Scotland supplementary guidance, we have concluded that SLC is a “less complex body”. Our wider scope significant risks are presented on pages [16 to 18](#). As part of this work, we will consider the arrangements in place to secure Best Value (BV).

Introduction (continued)

The key messages in this report (continued)

Regulatory change

IFRS 16, Leases, came into effect on 1 April 2022, therefore will be first implemented in financial year 2022/23. This will require adjustments to recognise on balance sheet arrangements currently treated as operating leases. Further details are provided on page [15](#).

Our commitment to quality

We are committed to providing the highest quality audit, with input from our market leading specialists, sophisticated data analytics and our wealth of experience.

Added value

Our aim is to add value to SLC through our external audit work by being constructive and forward looking, by identifying areas of improvement and by recommending and encouraging good practice. In this way, we aim to help SLC promote improved standards of governance, better management and decision making and more effective use of resources.

We have also shared our recent research, informed perspectives and best practice from our work across the wider public sector on pages [19 to 22](#) of this plan.

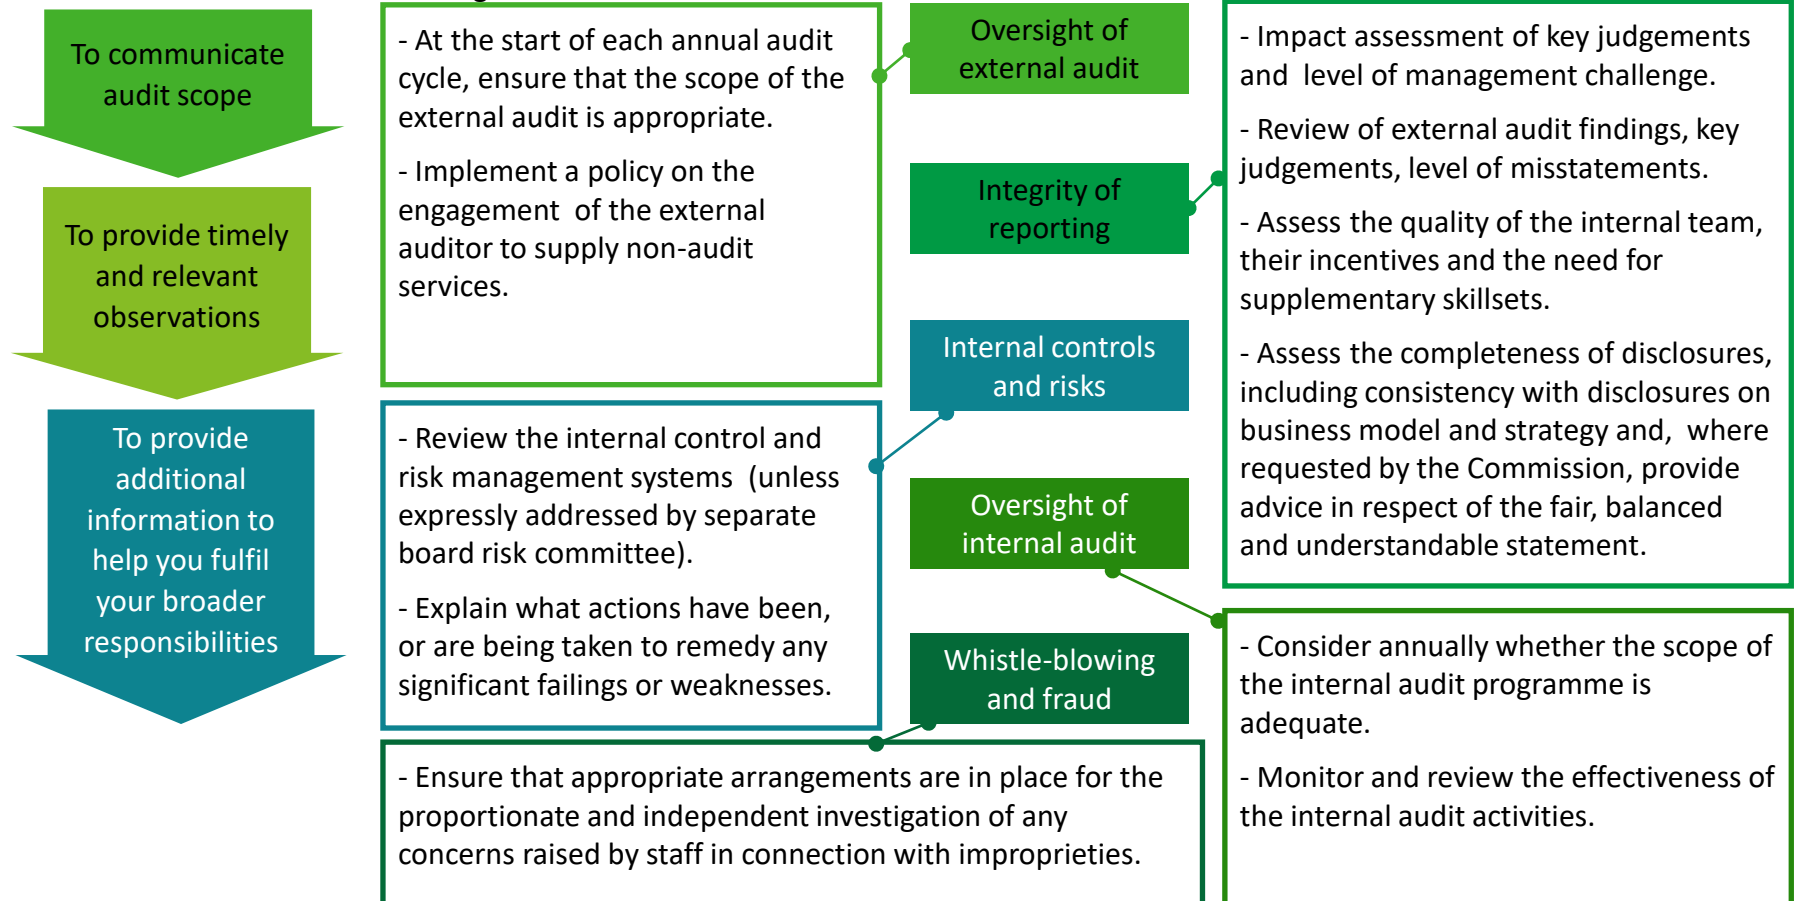

Pat Kenny
Associate Partner

Responsibilities of the Audit and Risk Committee

Helping you fulfil your responsibilities

Why do we interact with the Audit and Risk Committee?

As a result of regulatory change in recent years, the role of the Audit and Risk Committee has significantly expanded. We set out here a summary of the core areas of Audit and Risk Committee responsibility to provide a reference in respect of these broader responsibilities and highlight throughout the document where there is key information which helps the Audit and Risk Committee in fulfilling its remit.

Our audit explained

What we consider when we plan the audit

Responsibilities of management

We expect management and those charged with governance to recognise the importance of a strong control environment and take proactive steps to deal with deficiencies identified on a timely basis.

Auditing standards require us to only accept or continue with an audit engagement when the preconditions for an audit are present. These preconditions include obtaining the agreement of management and those charged with governance that they acknowledge and understand their responsibilities for, amongst other things, internal control as is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

FRC guidance on good practice

The FRC, in its Review of Governance Reporting, issued November 2021, has identified good practice as including a detailed description of the process for reviewing the effectiveness of risk management and internal control systems and clarity on what should be reported from the outcome of the review. This would include whether any weaknesses or inefficiencies were identified and explanations of what actions the Commission has taken, or will take, to remedy these.

Responsibilities of the audit committee

As explained further in the Responsibilities of the Audit and Risk Committee slide on page [5](#), the Audit and Risk Committee is responsible for:

- Reviewing internal financial controls and internal control and risk management systems (unless expressly addressed by a separate board risk committee or by the commission itself).
- Monitoring and reviewing the effectiveness of the internal audit function; where there isn't one, explaining the absence, how internal assurance is achieved, and how this affects the work of external audit.
- Reporting in the annual report on the annual review of the effectiveness of risk management and internal control systems.
- Explaining what actions have been, or are being taken to remedy any significant failings or weaknesses.

Our response

As stakeholders tell us they wish to understand how external audit challenges and responds to the quality of an entity's control environment, we are seeking to enhance how we plan and report on the results of the audit in response. We will be placing increased focus on how the control environment impacts the audit, from our initial risk assessment, to our testing approach and how we report on misstatements and control deficiencies.

An audit tailored to you

Overview of our audit plan

Identify changes in your business and environment

SLC continues to face significant financial pressures, with rising costs not being matched by increased funding. This is considered further on pages [16 to 18](#).

Scoping

Our scope is in line with the Code of Audit Practice issued by Audit Scotland. More detail is given on page [10](#).

In our final report

In our final report to you we will conclude on the significant risks identified in this paper, report to you our other findings, and detail those items we will be including in our audit report.

Determine materiality

We will use a materiality level of £31,000 in planning our audit. This is based on forecast gross expenditure. We will report to you any misstatements above £1,500. Further details on our materiality considerations are provided on page [9](#).

Significant risk assessment

We have identified significant audit risks in relation to SLC. More detail is given on pages [12 to 14](#).

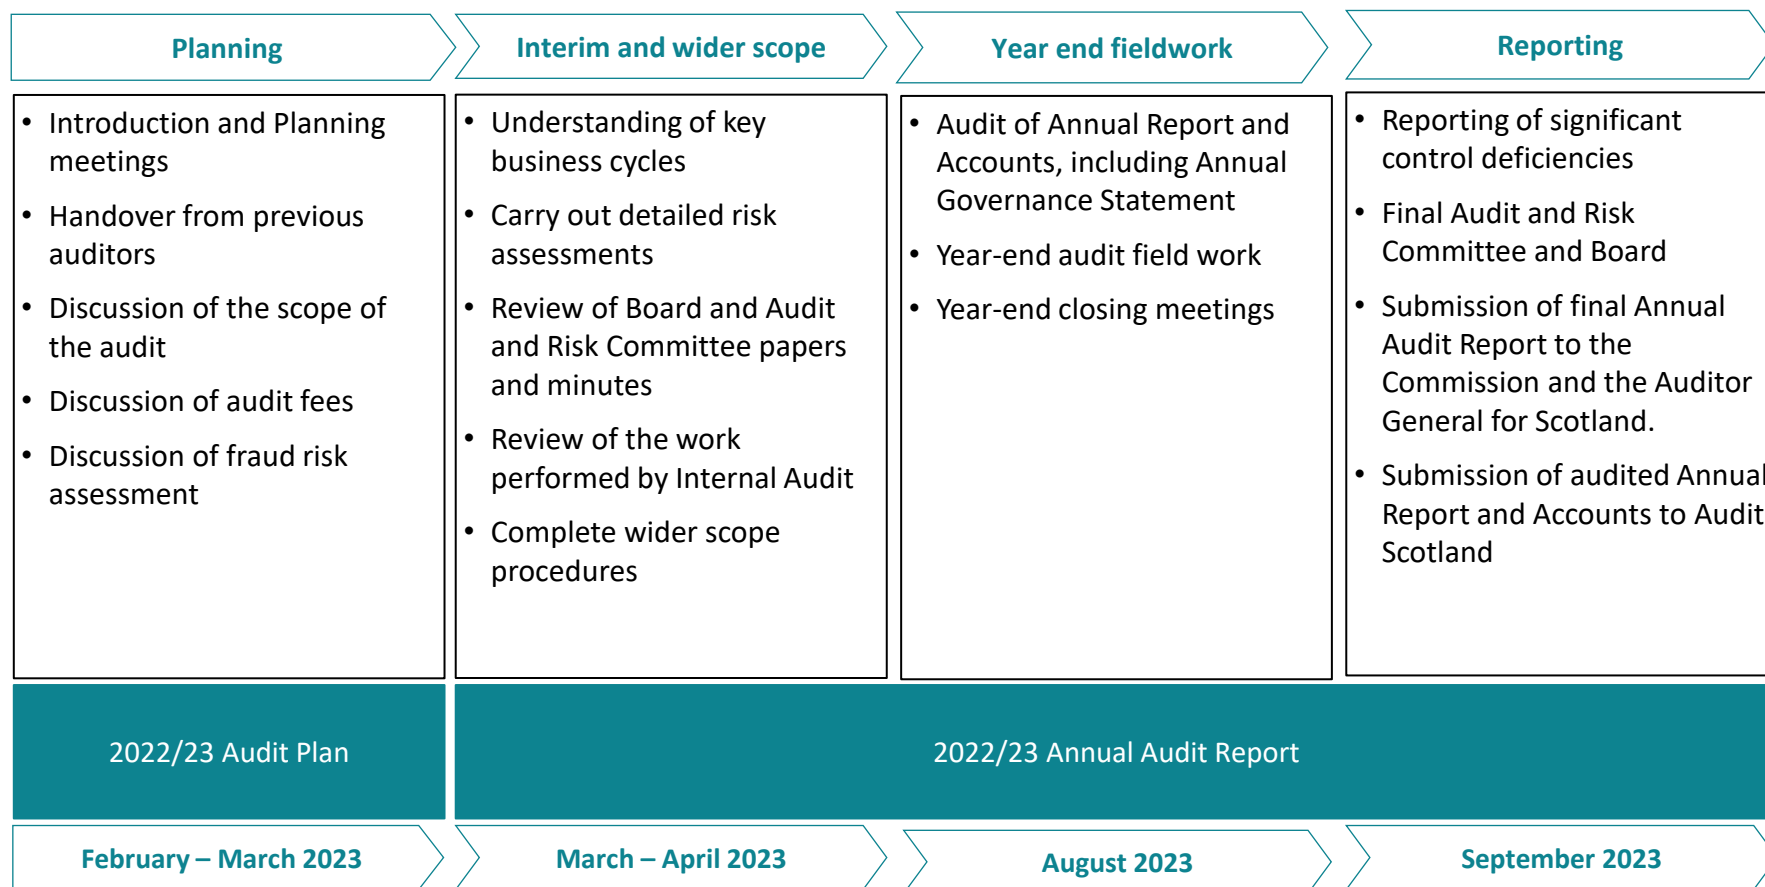

Quality and Independence

We confirm all Deloitte network firms and engagement team members are independent of SLC. We take our independence and the quality of the audit work we perform very seriously. Audit quality is our number one priority.

Continuous communication and reporting

Planned timing of the audit

As the audit plan is executed throughout the year, the results will be analysed continuously and conclusions (preliminary and otherwise) will be drawn. The following sets out the expected timing of our reporting to and communication with you.

Ongoing communication and feedback

Materiality

Our approach to materiality

Basis of our materiality benchmark

- The audit partner has determined materiality as £31,000 and performance materiality of £21,000, based on professional judgement, the requirement of auditing standards and the financial measures most relevant to users of the Annual Report and Accounts.
- We have used 2% of forecast gross expenditure as the benchmark for determining materiality and applied 70% as performance materiality. We have judged expenditure to be the most relevant measure for the users of the accounts.

Reporting to those charged with governance

- We will report to you all misstatements found in excess of £1,500.
- We will report to you misstatements below this threshold if we consider them to be material by nature.

Our approach to determining the materiality benchmark is consistent with Audit Scotland guidance, which states that the threshold for clearly trivial above which we should accumulate misstatements for reporting and correction to the Audit and Risk Committee must not exceed £250,000.

Our Annual Audit Report

We will:

- Provide comparative data and explain any changes compared to prior year
- Explain any normalised or adjusted benchmarks we use
- Explain the concept of performance materiality and state what percentage of materiality we used for the audit, with our rationale.

Although materiality is the judgement of the audit partner, the Audit and Risk Committee must satisfy themselves that the level of materiality chosen is appropriate for the scope of the audit.

1.1 Scope of work and approach

Our key areas of responsibility under the Code of Audit Practice

Auditors activity	Planned output	Proposed reporting timeline to the Committee	Audit Scotland/ statutory deadline
Audit of Annual Report and Accounts	Annual Audit Plan Independent Auditor's Report Annual Audit Report	31 March 2023* 11 September 2023 11 September 2023	31 March 2023* 31 October 2023 31 October 2023
Wider-scope areas	Annual Audit Plan Annual Audit Report	31 March 2023* 11 September 2023	31 March 2023* 31 October 2023
Consider and report on Best Value arrangements	Annual Audit Plan Annual Audit Report	31 March 2023* 11 September 2023	31 March 2023* 31 October 2023

*Annual Audit Plan to be shared with the Audit and Risk Committee on xx March 2023 for approval by correspondence.

1.2 Scope of work and approach

Our approach

Liaison with internal audit and local counter fraud

The Auditing Standards Board’s version of ISA (UK) 610 “Using the work of internal auditors” prohibits use of internal audit to provide “direct assistance” to the audit. Our approach to the use of the work of Internal Audit has been designed to be compatible with these requirements.

We will review their reports and meet with them to discuss their work where necessary. We will discuss the work plan for internal audit, and where they have identified specific material deficiencies in the control environment we consider adjusting our testing so that the audit risk is covered by our work.

Using these discussions to inform our risk assessment, we can work together with internal audit to develop an approach that avoids inefficiencies and overlaps, therefore avoiding any unnecessary duplication of audit requirements on the Commission's staff.

Approach to controls testing

Our risk assessment procedures will include obtaining an understanding of controls considered to be ‘relevant to the audit’. This involves evaluating the design of the controls and determining whether they have been implemented (“D&I”).

The results of our work in obtaining an understanding of controls and any subsequent testing of the operational effectiveness of controls will be collated and the impact on the extent of substantive audit testing required will be considered.

Promoting high quality reporting to stakeholders

We view the audit role as going beyond reactively checking compliance with requirements: we seek to provide advice on evolving good practice to promote high quality reporting.

We use and continually update International Financial Reporting Standards (“IFRS”) disclosure checklists in conjunction with the requirements of the FReM to support the Commission in preparing high quality drafts of the Annual Report and Accounts, which we would recommend the Commission complete during drafting.

Other reporting prescribed by the Auditor General

In addition to the opinion on the financial statements, we are also required to provide an opinion on the following:

- The regularity of expenditure and income;
- Whether the audited part of the Remuneration and Staff Report has been properly prepared; and
- Whether the Performance Report and Annual Governance Statement are consistent with the financial statements and have been properly prepared.

1.1 Significant risks

Significant risk dashboard

Risk	Fraud risk	Planned approach to controls	Level of management judgement	Management paper expected	Page no.
Risk 1 – Management override of controls					13
Risk 2 – Operating within expenditure resource limits					14

Level of management judgement

-  High degree of management judgement
-  Some degree of management judgement
-  Limited management judgement

Controls approach adopted

-  Assess design & implementation

1.2 Significant risks

Risk 1 – Management override of controls

Risk identified

In accordance with ISA (UK) 240 management override is a significant risk. This risk area includes the potential for management to use their judgement to influence the Annual Report and Accounts as well as the potential to override the Commission’s controls for specific transactions.

The key judgments in the Annual Report and Accounts are those which we have selected to be the significant audit risks - operating within expenditure resource limit . These are inherently the areas in which management has the potential to use their judgment to influence the Annual Report and Accounts .

Our response

In considering the risk of management override, we plan to perform the following audit procedures that directly address this risk:

- We will consider the overall control environment and ‘tone at the top’;
 - We will test the design and implementation of controls relating to journals and accounting estimates;
 - We will make inquiries of individuals involved in the financial reporting process about inappropriate or unusual activity relating to the processing of journal entries and other adjustments.
 - We will test the appropriateness of journals and adjustments made in the preparation of the Annual Report and Accounts . We will use Spotlight data analytics tools to select journals for testing, based upon identification of items of potential audit interest.
 - We will review accounting estimates, including a retrospective review, for biases that could result in material misstatements due to fraud and perform testing on key accounting estimates as discussed above.
 - We will obtain an understanding of the business rationale of significant transactions that we become aware of that are outside of the normal course of business for the entity, or that otherwise appear to be unusual, given our understanding of the entity and its environment.
-

1.3 Significant risks (continued)

Risk 2 – Operating within the expenditure resource limits

Risk identified Under Auditing Standards there is a rebuttable presumption that the fraud risk from revenue recognition is a significant risk. We have concluded that this is not a significant risk for the Commission as there is little incentive to manipulate revenue recognition with the majority of revenue being from the Scottish Government which can be agreed to confirmations supplied.

We therefore consider the fraud risk to be focused on how management operate within the expenditure resource limits set by the Scottish Government. The risk is that SLC could materially misstate expenditure in relation to year end transactions, in an attempt to align with its tolerance target or achieve a breakeven position.

The significant risk is therefore pinpointed to the completeness of accruals and the existence of prepayments made by management at the year end and invoices processed around the year end as this is the area where there is scope to manipulate the final results. Given the financial pressures across the whole of the public sector, there is an inherent fraud risk associated with the recording of accruals and prepayments around year end.

Our response We will evaluate the results of our audit testing in the context of the achievement of the limits set by the Scottish Government. Our work in this area will include the following:

- Evaluating the design and implementation of controls around monthly monitoring of financial performance and the estimated accruals and prepayments made at the year-end;
 - Obtain independent confirmation of the resource limits allocated to SLC by the Scottish Government;
 - Perform focused testing of a sample of accruals and prepayments made at the year end; and
 - Performing focused cut-off testing of a sample of invoices received and paid around the year end.
-

Other areas of audit focus

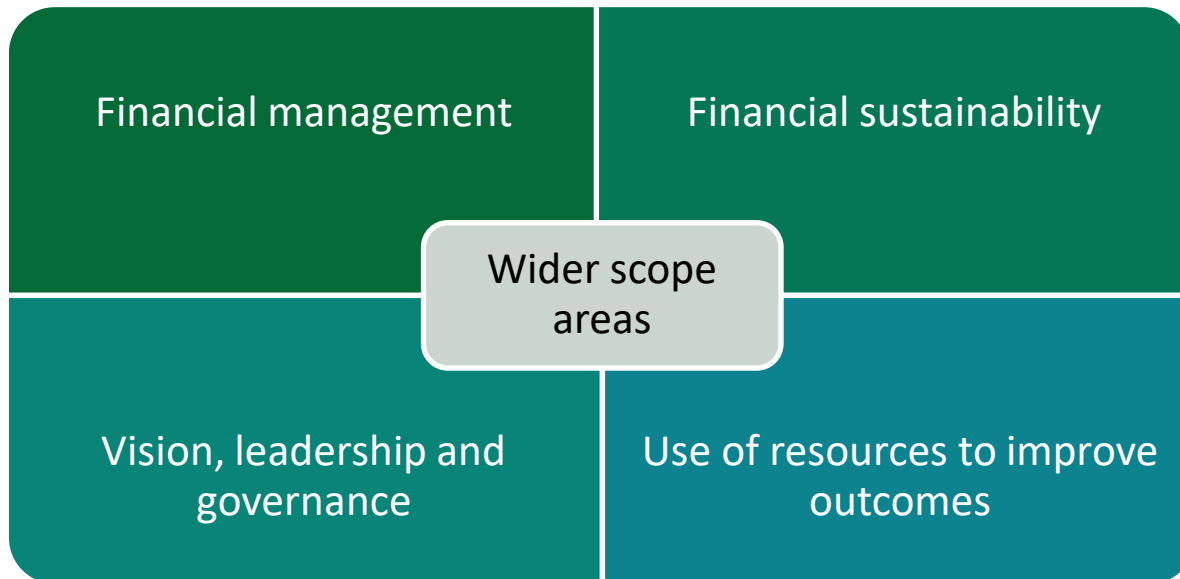

We have identified the below areas of audit interest, although do not consider these to be significant risks

Risk identified	IFRS 16
Summary	<p>IFRS 16 is effective for central government bodies from 1 April 2022 and the introduction of IFRS 16 will have a significant impact on the balance sheet and on recorded capital expenditure for SLC.</p> <p>SLC disclosed the potential impact of IFRS 16 in the 2021/22 financial statements, which were audited during the prior year audit with no issues noted. The SLC has since moved to new office space resulting in a change to this estimate. While we have still to review the lease agreement for the office space, our initial understanding is that this would not fall within the IFRS 16 requirements</p> <p>We recommend that an accounting paper is presented to the Audit Committee on the transition for review and approval as part of the Commission's governance over financial reporting.</p>
Deloitte response	<p>We will request from management an accounting paper on the implementation of IFRS 16 (including the controls in place over reporting under the standard, and any judgements identified in transition and in-year application).</p> <p>During our final audit we will perform testing of SLC's IFRS 16 disclosures, including any new judgements.</p>

1.1 Wider scope requirements

Overview

Reflecting the fact that public money is involved, public audit is planned and undertaken from a wider perspective than in the private sector. The wider-scope audit specified by the Code of Audit Practice broadens the audit of the accounts to include consideration of additional aspects or risks in the following areas.

The Scottish Public Finance Manual (SPFM) explains that Accountable Officers have a specific responsibility to ensure that arrangements have been made to secure Best Value. Ministerial guidance to Accountable Officers for public bodies sets out their duty to ensure that arrangements are in place to secure Best Value in public services. As part of our wider scope audit work, we will consider whether there are organisational arrangements in place in this regard.

1.2 Wider scope requirements (continued)

Overview and significant risk

As part of our risk assessment, we have considered the arrangements in place for the wider-scope areas and concluded that it is appropriate to apply the “less complex bodies” exemption to SLC on the basis of the following quantitative and qualitative criteria:

- SLC is not of strategic importance to the Auditor General, is not a listed entity, charity and does not prepare group accounts.
- SLC has not requested a full wider scope.
- Gross revenue, assets and liabilities are all below £10.2m, which in accordance with the planning guidance, is likely be considered “less complex”.
- Based on qualitative criteria from our planning work and handover from previous auditors, we have not identified any wider scope risks beyond financial sustainability, as set out below.

Area	Significant risks identified	Planned audit response
Financial sustainability	<p>SLC have a medium term financial plan in place that highlights the potential gaps in future funding if the level of Grant-in-Aid (GiA) were not increased. The Scottish Government’s Land Reform Bill consultation also has the potential to significantly change the responsibilities of the SLC.</p> <p>There is therefore a significant risk that robust medium term planning arrangements are not in place to ensure that SLC can manage its finances sustainably and deliver services effectively, identify issues, challenge early and act on them promptly.</p>	<p>We will assess the development of the 2023/24 budget and SLCs actions in respect of its medium term financial plan to assess whether financial balance can be achieved. As part of this, we will consider how SLC is managing the risks associated with the changes as a result of the Land Reform Bill.</p>

1.3 Wider scope requirements (continued)

National Risks

In its planning guidance, Audit Scotland has highlighted the following national or sectoral risk that the Audit General and Accounts Commission wish auditors to consider at all bodies during the 2022/23 audit.

Area	Risk	Audit response
Cyber security	There continues to be a significant risk of cyber-attacks to public bodies, and it is important that they have appropriate cyber-security arrangements in place. A number of recent incidents have demonstrated the significant impact that a cyber-attack can have on both the finances and operations of an organisation.	As discussed further on page 27 , the revised ISA (UK) 315 includes enhanced requirements for auditors to understand a body's use of IT in its business, the related risks and the system of internal control addressing such risks. The Auditor General and Accounts Commission has confirmed that these additional requirements is likely to be sufficient consideration of cyber security in 2022/23 and therefore there is no additional work specified by Audit Scotland

Other Requirements

Area	Requirements
Anti-money laundering	We are required to ensure that arrangements are in place to be informed of any suspected instances of money laundering at audited bodies. Any such instances will be advised to Audit Scotland.
Fraud returns	We are required to prepare and submit fraud returns to Audit Scotland for all frauds at audited bodies: <ul style="list-style-type: none">• Involving the misappropriation or theft of assets or cash which are facilitated by weaknesses in internal control• Over £5,000.

1.1 Reporting hot topics

Ongoing macro-economic uncertainty

Reporting in times of uncertainty

Businesses face unprecedented uncertainty from a variety of sources, including stresses arising from energy supply and costs, inflation, foreign exchange volatility, commodity availability and pricing, global supply chain disruption, labour shortages and the impacts of climate change. Many of these issues are exacerbated by the ongoing conflict between Russia and Ukraine.

High-quality, transparent reporting that clearly explains the impact of these uncertainties on SLC's financial position, performance and cash flows, as well as the Commission's response to these risks, remains as important as ever.

Impact of ongoing macro-economic uncertainty – Considerations

The current macro-economic uncertainty and the resulting challenges have a pervasive impact on the financial statements and need to be considered comprehensively across all account balances and disclosures, in particular those involving estimation or judgement.

Sources of uncertainty likely to impact SLC's operations and corporate reporting include:

- **High energy costs and risk of energy shortages**
- **Rising interest rates**
- **Rising levels of inflation**
- **Supply chain disruptions**
- **Continued pressures on labour supply and wages**

Impact of ongoing macro-economic uncertainty – Action

We expect all Boards to have undertaken a comprehensive, evidence-based assessment of the risks relating to macroeconomic conditions including for example, higher energy costs, supply chain disruption, rising levels of inflation, commodity availability and labour shortages. Consideration should be given to how those risks affect both the operations of SLC and the impact on the annual report and financial statements as a whole.

We expect Boards to have considered the pressures throughout the value chain(s) in which they operate, including an assessment of the risks relating to suppliers and operations.

1.2 Reporting hot topics (continued)

Climate related risks

Deloitte view

The expectations of corporate reporting are increasing. While the focus is primarily on corporates, we highlight these areas where improved disclosures would help meet stakeholder expectations.

Accounting for and reporting of climate-related risks – Considerations

Stakeholder expectations

Stakeholders are clear that climate-related risks could be material to businesses in all sectors. In particular, stakeholders ask for clear, specific and quantified information that describes:

- how the impacts of physical and transition risks have been considered in preparing the financial statements;
- what climate-related assumptions and estimates were used to prepare the financial statements; and
- whether narrative reporting on climate risks and the accounting assumptions are consistent, or an explanation for any divergence.

Climate thematic reports

In July 2022, the [FCA](#) and [FRC](#) published **thematic reviews of TCFD disclosures and climate-related impacts** reported in premium listed entities' financial statements. This follows up on the FRC's [2020 thematic review](#) of climate-related considerations.

The FRC highlighted five broad areas for improvements in climate-change reporting in their thematic review:

- giving more **granular and company specific information** about the effects of climate change on different businesses, sectors and geographies;
- ensuring that the discussion of climate-related risks and opportunities is **balanced**;
- **linking climate-related disclosures**, such as the output of climate-related scenario analysis, with other relevant narrative disclosures in the annual report, such as the business model or strategy;
- explaining how **materiality** has been applied in deciding which climate-related information should be disclosed; and
- ensuring **connectivity between TCFD disclosures and the financial statements** to help investors understand the relationship between climate-related matters and judgements and estimates applied in the financial statements – for example, explaining clearly how different climate-related scenarios and the companies' own net zero commitments have been reflected in the financial statements.

The FRC report also includes disclosure examples and detailed expectations and can be found on the FRC's website [here](#).

1.3 Reporting hot topics (continued)

Climate related risks

Accounting for and reporting of climate-related risks - Action

Governance

The impacts of climate change are a strategic issue that should be on the Commission agenda and integrated into decision making. We expect entities to have:

- Reviewed their governance, processes and controls for identifying, and responding to, climate-related issues;
- Completed a robust climate assessment including all physical and transition risks;
- Assessed the climate change assumptions used in judgements and estimates in the financial statements;
- Evaluated the appropriateness and consistency of information in the financial statements and narrative disclosures; and
- Prepared a management paper setting out management's climate risk assessment and consideration of the impacts of climate change on the financial statements.

Financial statements

Regarding financial statement disclosures, we expect entities to consider the transparency of information about the climate-related judgements and assumptions. Information should be entity-specific and avoid boilerplate explanations.

The financial statements should clearly disclose:

- what climate-related assumptions have been used in preparing the financial statements;
- how significant climate risks or net zero transition targets have been taken into account in preparing the financial statements;
- which climate-related scenarios have been considered in sensitivity analysis of climate-related assumptions and how they affect judgements and estimates in the financial statements.

Narrative reporting

We expect the narrative accompanying the financial statements to include the following:

- An explanation of how climate is assessed as a strategic issue.
- Clarity of whether climate change represents a principal or emerging risk and how it is being managed.
- For climate-related targets and metrics, an explanation of how those targets and metrics fit into strategic targets/approach.

1.4 Reporting hot topics (continued)

Cyber risk

Area	Management actions	Impact on the financial statements and annual report	Impact on our audit
Cyber risk	SLC circulate information to employees around the dangers of cyber risk and highlight the importance of being aware of this. A policy is in place “Tecnica” to follow in the event of any cyber security breach.	Cyber risk is an increasing area of focus, including a focus for the Auditor General and Accounts Commission as discussed on page <u>18</u> . We recommend considering whether any additional disclosure or explanations are appropriate, including discussion of principal risks and uncertainties, or in the Annual Governance Statement. The AGS requires disclosure of how risks to data security are managed and controlled, as well as of any serious information governance incidents.	We will obtain an understanding of SLC and its internal controls in relation to cyber as part of our understanding of the SLC’s IT environment. We will make specific enquiries to identify whether a cyber breach has occurred during the period, and evaluate the impact of any cyber incidents, including any potential liabilities arising or impacts on compliance with laws or regulation. We will review the disclosures made for consistency with our understanding from our audit work.

Audit quality

Our commitment to audit quality

Our objective is to deliver a distinctive, quality audit to you. Every member of the engagement team will contribute, to achieve the highest standard of professional excellence.

In particular, for your audit, we consider that the following steps will contribute to the overall quality:

We will apply professional scepticism on material issues and significant judgements by using our expertise in the sector and elsewhere to provide robust challenge to management.

We have obtained a deep understanding of your business, its environment and of your processes in income and expenditure recognition, payroll expenditure enabling us to develop a risk-focused approach tailored to SLC.

Our engagement team is selected to ensure that we have the right subject matter expertise and industry knowledge. In order to deliver a quality audit to you, each member of the core audit team has received tailored learning to develop their expertise in audit skills, delivered by Pat Kenny (Associate Partner).

Engagement Quality Control Review

We have developed a tailored Engagement Quality Control approach.

We have developed a tailored Engagement Quality Control approach. Our dedicated Professional Standards Review (PSR) function will provide a 'hot' review before any audit or other opinion is signed. PSR is operationally independent of the audit team, and supports our high standards of professional scepticism and audit quality by providing a rigorous independent challenge.

Audit quality (continued)

FRC Audit Quality Inspection and Supervision report

We are proud of our people's commitment to delivering high quality audits and we continue to have an uncompromising focus on audit quality. Audit quality is and will remain our number one priority and is the foundation of our recruitment, learning and development, promotion and reward structures.

In July 2022 the Financial Reporting Council ("FRC") issued individual reports on each of the seven largest firms, including Deloitte, on Audit Quality Inspections providing a summary of the findings of its Audit Quality Review ("AQR") team for the 2021/22 cycle of reviews.

We greatly value the FRC reviews of our audit engagements and firm wide quality control systems, a key aspect of evaluating our audit quality.

In that context, we are pleased that both the overall and FTSE 350 inspection results for our audits selected by the FRC as part of the 2021/22 inspection cycle show an improvement. 82% of all inspections in the current cycle were assessed as good or needing limited improvement, compared to 79% last year. Of the FTSE 350 audits reviewed, 91% achieved this standard (2020/21: 73%). This reflects our ongoing focus on audit quality, and we will maintain our emphasis on continuous improvement as we seek to further enhance quality.

We welcome the breadth and depth of good practice points identified by the FRC particularly those in respect of the effective challenge of management and group audit oversight, where the FRC also reports findings.

We are also pleased that previous recurring findings relating to goodwill impairment and revenue were not identified as key finding in the current FRC inspection cycle, reflecting the positive impact of actions taken in previous years. We nevertheless remain committed to sustained focus and investment in these areas and more broadly to achieve consistently high quality audits.

All the AQR public reports are available on its website:

<https://www.frc.org.uk/auditors/audit-quality-review/audit-firm-specific-reports>

The AQR's 2021/22 Audit Quality Inspection and Supervision Report on Deloitte LLP

"In the 2021/22 public report, we concluded that the firm had made progress on actions to address our previous findings and made improvements in relation to its audit execution and firm-wide procedures. The firm has continued to show improvement, with an increase in the number of audits we assessed as requiring no more than limited improvements to 82% compared with 79% in the previous year and 80% on average over the past five years. It is also encouraging that none of the audits we inspected were found to require significant improvements.

The area which contributed most to the audits requiring improvement was the audit of estimates of certain provisions. There were also key findings in relation to group audits, the review and challenge by the Engagement Quality Control Review (EQCR) partner and the application of the FRC Ethical Standard."

Purpose of our report and responsibility statement

Our report is designed to help you meet your governance duties

What we report

Our report is designed to establish our respective responsibilities in relation to the Annual Report and Accounts audit, to agree our audit plan and to take the opportunity to ask you questions at the planning stage of our audit. Our report includes:

- Our audit plan, including key audit judgements and the planned scope; and
- Key regulatory and corporate governance updates, relevant to you

Use of this report

This report has been prepared for the Audit and Risk Committee, as a body, and we therefore accept responsibility to you alone for its contents. We accept no duty, responsibility or liability to any other parties, since this report has not been prepared, and is not intended, for any other purpose. Except where required by law or regulation, it should not be made available to any other parties without our prior written consent.

We welcome the opportunity to discuss our report with you and receive your feedback.

What we don't report

As you will be aware, our audit is not designed to identify all matters that may be relevant to the Commission.

Also, there will be further information you need to discharge your governance responsibilities, such as matters reported on by management or by other specialist advisers.

Finally, the views on internal controls and business risk assessment in our final report should not be taken as comprehensive or as an opinion on effectiveness since they will be based solely on the audit procedures performed in the audit of the financial statements and the other procedures performed in fulfilling our audit plan.

Other relevant communications

We will update you if there are any significant changes to the audit plan.

Deloitte LLP

Glasgow | 31 March 2023

Technical and sector developments

1.1 Revisions to auditing standards coming into effect

ISA (UK) 315 – Identifying and Assessing the Risks of Material Misstatement

The International Auditing and Assurance Standards Board (IAASB) issued a revised risk assessment standard in December 2019, that takes effect for periods commencing on or after 15 December 2021. For most Scottish public sector bodies, this will be March 2023 year ends and later. The FRC has adopted the standard in the UK with minimal additions.

The revision was made to respond to challenges and issues with the current standard and requires a more robust risk identification and assessment. We had already incorporated many of the changes into our methodology in advance of the standard being introduced, but we summarise on the next few slides some of the areas where this may impact our audit.

“The IAASB recognizes the importance, and also the complexity, of the auditor’s risk assessment process”

IAASB’s basis for conclusions, ISA 315

Area of change	Impact on our audit	Impact on the entity
New requirement to evaluate the 4 entity-level components of internal control	<p>Whilst we have always been required to gain an understanding of the entity and its environment, including its internal controls, the new standard is more prescriptive on the need to go further and evaluate the 4 entity level controls components: the entity’s control environment, risk assessment process, monitoring of internal control, and information system.</p> <p>This could lead to an increase in the number of relevant controls.</p>	<p>You will need to consider the adequacy of your entity-level controls, and documentation thereof.</p> <p>You should also expect more granular inquiries regarding the control environment.</p>
Enhanced consideration of the types of relevant controls	<p>Overall we expect to identify an increased number of relevant controls, particularly for controls designed to address risks at the higher end of the spectrum of inherent risk and controls over reconciliations. Where new relevant controls are identified, we may also identify control deficiencies and need to consider the effect of these.</p>	<p>You should expect more challenge of controls, particularly over complex accounting estimates, financial reporting and complex or highly automated business processes.</p>

1.2 Revisions to auditing standards coming into effect (continued)

ISA (UK) 315 – Identifying and Assessing the Risks of Material Misstatement (continued)

Area of change	Impact on our audit	Impact on the entity
Enhanced understanding of IT and General IT controls	<p>As we identify more relevant controls, it is likely there will be more relevant IT controls (e.g. automated controls) which themselves rely on underlying General IT Controls (GITCs).</p> <p>We may need more IT specialist involvement to gain an enhanced understanding of IT controls and GITCs, particularly where there are a high volume of automated transactions in the entity. Similarly, where new IT systems come into scope, the likelihood is that there will be an increase in the number of deficiencies identified and action will be needed to determine the appropriate response.</p>	You should expect more challenge over the effectiveness of your GITCs, including how these are monitored.
New approach to scoping account balances, classes of transactions and disclosures	We may now identify some account balances as “material but not significant” where we do not identify a risk of material misstatement, but where we are required to perform some substantive testing.	We may need to perform more substantive testing on balances, where previously there was no separate category of material but not significant.
Revised definition of a significant risk, focused on risks at the upper end of a spectrum of inherent risk	We do not anticipate there being a significant increase in the number of significant risks identified, but where there are more material judgements or estimates being made and a significant risk has not been identified previously, we may conclude there is a significant risk.	You should expect more challenge on audits where before there were no significant risks beyond management override of controls.
Stand back requirement and increased focus on professional scepticism	Our audit approach already acknowledges that risk assessment is an iterative process as well as emphasising the importance of professional scepticism. We will use this as an opportunity to challenge ourselves on the evidence that professional scepticism has been applied through the risk assessment processes, including as part of the stand back assessment.	You should expect more challenge of the evidence provided in respect of our risk assessment, including revisiting this towards the concluding stage of the audit.

1.3 Revisions to auditing standards coming into effect (continued)

ISA (UK) 240 – The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements

The Financial Reporting Council (FRC) issued a revised fraud standard in May 2021, that takes effect for periods commencing on or after 15 December 2021 (i.e. March 2023 year ends for most Scottish public sector bodies).

Many of the revisions provide increased clarity as to the auditor's obligations and codify existing expectations or best practice. The updates to the ISA do not include any changes relating to proposals in the Government's White Paper regarding auditor reporting on a statement by directors on the steps they have taken to prevent and detect material fraud.

We summarise on the next few slides how this will impact our audit.

Area of change	Impact on our audit	Impact on the entity
Fraud inquiries	<p>In addition to the pre-existing required enquiries, we are now explicitly required to make inquiries of management or others at the entity who handle whistleblowing.</p> <p>We also required to discuss the risks of fraud with those charged with the governance, including those risks specific to the entity's business sector.</p>	You should expect further challenge in relation to who we speak to in relation to fraud at the entity, including more focus on entity/sector specific risks.
Engagement team discussions	<p>The revised ISA (UK) emphasises that the pre-existing audit team fraud discussion should explicitly include an exchange of ideas about fraud, incentives to commit fraud, and how management could perpetrate and conceal fraud.</p> <p>There is also an explicit requirement for the engagement partner to consider whether further fraud discussions should be held at later stages of the audit.</p>	You should expect increased challenge of the controls and processes in relation to the entity's own fraud risk assessment and the documentation of that assessment.

1.4 Revisions to auditing standards coming into effect (continued)

ISA (UK) 240 – The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements

Area of change	Impact on our audit	Impact on the entity
Identified or suspected fraud by a key member of management	The revised ISA (UK) clarifies that if we identify or suspect fraud by a key member of management this may be qualitatively material.	Further challenge in relation to identified or suspected fraud by a key member of management.
Involvement of specialists	We are explicitly required to determine whether the engagement team needs specialised skills and knowledge: <ul style="list-style-type: none">• To perform the fraud risk assessment procedures, to identify and assess the risk of material misstatement due to fraud, to design and perform audit procedures to respond to those risks or to evaluate the audit evidence obtained; or• Where a misstatement due to fraud or suspected fraud is identified.	There is likely to be more interaction with fraud specialists as part of our planning procedures.
Journal entry testing	We were already required to test the appropriateness of journal entries and other adjustments made in the preparation of the financial statements and make inquiries of personnel. The revised ISA (UK) clarifies that our selection process should consider specifically both automated and manual journals, consolidation adjustments (in the preparation of group financial statements), and post-closing entries. The standard also emphasises that when making inquiries about inappropriate or unusual activity relating to the processing of journal entries and other adjustments, we should make inquiries of individuals with different levels of responsibility in the financial reporting process.	You should expect more challenge on GITCs over the identification and classification of automated and manual controls, especially where there are IT deficiencies. There will also be more inquiries with people at different levels of responsibility at the entity.

1.5 Revisions to auditing standards coming into effect (continued)

ISA (UK) 240 – The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements

Area of change	Impact on our audit	Impact on the entity
Representations from those charged with governance	We will request an additional representations from those charged with governance regarding their responsibilities for the prevention and detection of fraud.	You should expect updated representations from those charged with governance that they believe they have appropriately fulfilled their responsibilities to design, implement and maintain internal control to prevent and detect fraud.

Sector developments

The State of the State report 2022/23 – From the pandemic to a cost of living crisis

Background and overview

The 11th edition of Deloitte and Reform's report on the UK public sector was launched in November 2022. Since 2012, we have aimed to create an annual snapshot of what's happening across government and public services to serve as an evidence base for informed discussion.

This year's State of the State finds public attitudes deeply affected by the cost of living crisis, pessimistic for the future and passionate about climate change.

After years of reacting to crises, the latest State of the State report finds officials across the public sector eager for reform and calling for bold decisions about the future of government and public services.

Some key messages:

- The public are split on the right balance between taxes, borrowing and public spending;
- The public's message to government: deal with the crises, but don't neglect net zero;
- Our survey data found that the Scottish and Welsh Governments, as well as the NHS, are among the most trusted parts of the public sector but trust has slipped overall;
- Public sector leaders are eager for reform and calling for bold decisions about the future of government and public services.

Sector developments (continued)

Good practice in annual reporting – National Audit Office (NAO)

Background and overview

Effective annual reporting in the public sector is more important than ever. The COVID-19 pandemic and, more recently, the energy price crisis have resulted in extraordinary public spending interventions by the government to support the public and the economy. Making government spending transparent and understandable to those who fund it – taxpayers – is therefore critical. Annual reports must clearly tell the ‘story’ of how these monies have been spent and what has been achieved. Crucially, annual reports and accounts must give assurance on how effective outcomes are being secured and how the risk of fraud and loss to the public purse is being appropriately managed and controlled.

Good reporting equips stakeholders with information they can use to hold organisations to account. This is why high-quality annual reports and accounts are fundamental to effective accountability.

The NAO has published a guide setting out good practice principles that it believes underpin good annual reporting. These principles are grouped under: **Supporting accountability**, **Transparency**, **Accessibility**, and the need for the report to be **Understandable**. Against these principles, the guide highlights examples which demonstrate attributes of good-practice reporting, including:

- Joined-up reporting.
- A frank and balanced assessment of risks and opportunities facing an organisation.
- Understandable non-financial information.
- Linkage between financial and non-financial information.
- Accessibility considerations.

Next steps

The full guide has been shared with management for consideration as part of the preparation for the 2022/23 Annual Report and Accounts and is available at [Good practice in annual reporting - National Audit Office \(NAO\) insight](#)

Appendices

Our other responsibilities explained

Fraud responsibilities

Your Responsibilities:

The primary responsibility for the prevention and detection of fraud rests with management and those charged with governance, including establishing and maintaining internal controls over the reliability of financial reporting, effectiveness and efficiency of operations and compliance with applicable laws and regulations.

Our responsibilities:

- We are required to obtain representations from your management regarding internal controls, assessment of risk and any known or suspected fraud or misstatement.
- As auditors, we obtain reasonable, but not absolute, assurance that the financial statements as a whole are free from material misstatement, whether caused by fraud or error.
- As set out in the significant risks section of this document, we have identified risks of material misstatement due to fraud in operating within the expenditure resource limits, and management override of controls.
- We will explain in our audit report how we considered the audit capable of detecting irregularities, including fraud. In doing so, we will describe the procedures we performed in understanding the legal and regulatory framework and assessing compliance with relevant laws and regulations.
- We will communicate to you any other matters related to fraud that are, in our judgment, relevant to your responsibilities. In doing so, we shall consider the matters, if any, regarding management's process for identifying and responding to the risks of fraud and our assessment of the risks of material misstatement due to fraud.

Fraud Characteristics:

- Misstatements in the financial statements can arise from either fraud or error. The distinguishing factor between fraud and error is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional.
- Two types of intentional misstatements are relevant to us as auditors – misstatements resulting from fraudulent financial reporting and misstatements resulting from misappropriation of assets.

Our other responsibilities explained (continued)

Fraud responsibilities (continued)

We will make the following inquiries regarding fraud and non-compliance with laws and regulations:

Management and other personnel:

- Management's assessment of the risk that the financial statements may be materially misstated due to fraud, including the nature, extent and frequency of such assessments.
- Management's process for identifying and responding to risks of fraud.
- Management's communication, if any, to those charged with governance regarding its processes for identifying and responding to the risks of fraud.
- Management's communication, if any, to employees regarding its views on business practices and ethical behaviour.
- Whether management has knowledge of any actual, suspected or alleged fraud affecting the entity.
- We plan to involve management from outside the finance function in our inquiries, in particular the Chief Executive.
- We will also make inquiries of personnel who are expected to deal with allegations of fraud raised by employees or other parties.

Internal audit

- Whether internal audit has knowledge of any actual, suspected or alleged fraud affecting the entity, and to obtain its views about the risks of fraud.

Those charged with governance

- How those charged with governance exercise oversight of management's processes for identifying and responding to the risks of fraud in the entity and the internal control that management has established to mitigate these risks.
- Whether those charged with governance have knowledge of any actual, suspected or alleged fraud affecting the entity.
- The views of those charged with governance on the most significant fraud risk factors affecting the entity, including those specific to the sector.

Independence and fees

As part of our obligations under International Standards on Auditing (UK), we are required to report to you on the matters listed below:

Independence confirmation

We confirm the audit engagement team, and others in the firm as appropriate, Deloitte LLP and, where applicable, all Deloitte network firms are independent of SLC and will reconfirm our independence and objectivity to the Audit and Risk Committee for the year ending 31 March 2023 in our final report to the Audit and Risk Committee.

Fees

The expected fee for 2022/23 was communicated by Audit Scotland in December 2022. As noted on page [16](#) we have concluded that SLC meets the definition of a “less complex body” and as such have applied a reduced Auditor remuneration:

	£
Auditor remuneration	25,375
Audit Scotland fixed charges:	
• Pooled costs	(550)
• Audit support costs	990
• Sectoral cap adjustment	(1,390)
Total expected fee	24,425

There are no non-audit fees.

Non-audit services

In our opinion there are no inconsistencies between the FRC’s Ethical Standard and the Commission’s policy for the supply of non-audit services or any apparent breach of that policy. We continue to review our independence and ensure that appropriate safeguards are in place including, but not limited to, the rotation of senior partners and professional staff and the involvement of additional partners and professional staff to carry out reviews of the work performed and to otherwise advise as necessary.

Relationships

We have no other relationships with the Commission, its directors, senior managers and affiliates, and have not supplied any services to other known connected parties.
